7E/7E TALL

Classe 7 has been studied to combine functionality, ergonomics and a contemporary look. Extremely versatile and elegant, Classe 7 is available in the 2 group COMPACT, 2 and 3 group versions as well as the TALL version for coffee based beverages requiring higher glasses.

The textural finish of Classe 7 components is enhanced throughout, while fully exploiting the technological characteristics of each element. The embossed black base and side panels confer greater assertiveness and personality to the product. To complete the features of this machine, side-mounted shockproof bumpers made from a resilient and sophisticated non-scratch polymer material provide ample protection even when working under pressure. The application of high-gloss stainless steel on the control, front and rear panels of the housing, together with group head covers in chrome-plated Zamak, make Classe 7 an upscale product with a strikingly modern style.

With its double protective sleeve to insulate against heat, the new Cool Touch steam wand eliminates the risk of possible accidental contact with very high temperatures during use. The innovative steam outlet has an ergonomic and contemporary design that befits this Rancilio Classe product line. But, most of all, this machine is convenient and extremely practical to use.

Classe 7 has an ergonomic lighting system in the work area to make the barista's job easier plus chrome group covers and all the distinctive stylish accessories from the Rancilio range.

Electronic control and automatic dosing for practical preparation with consistent results.
